Θέμα: New Master's Degree Program in Agriculture, Ecology & Societies

Ημερομηνία: Mon, 3 Apr 2023 05:51:02 +0000

Από: FB07 Erasmus <fb07-erasmus@uni-kassel.de>

Dear Partner and Colleagues,

We would like to share an interesting offer by the Faculty of Organic Agricultural Sciences of the University of Kassel with you:

Dear colleagues,

Starting in October 2023, the University of Kassel offers a transdisciplinary Master's degree program in 'Agriculture, Ecology & Societies', dealing with the challenges of sustainability transitions in the agricultural and food system.

International students can apply until the 1st of May. Those with a Bachelor's degree from a German university can apply from the 1st of June. Detailed information can be found here: <https://www.uni-kassel.de/uni/en/27131>

If you can pass the following information on to potentially interested students with a background in agriculture, social sciences, economics or humanities, we would appreciate that very much.

Thank you, and warm greetings,

Faculty of Organic Agricultural Sciences

Announcement: New Master Program "Agriculture, Ecology & Societies" (AGES) at University of Kassel, Germany: <https://www.uni-kassel.de/uni/en/27131>

Agriculture is political, biophysical, philosophical, ecological...

To transform our food systems sustainably we need change makers who understand and systematically mediate between these dimensions.

The pioneering Master program 'Agriculture, Ecology & Societies' (AGES) at University of Kassel will prepare you to work at the forefront of sustainability transitions in agriculture: In public and international agencies, responsible firms, NGOs and research institutes - plus on farms that experiment with new methods of sustainable production.

Kassel-Witzenhausen is the only university campus in Europe that (since 1996) has focused exclusively on organic agriculture, its governance and development. In this Master program, we combine expertise with three faculties at Kassel University's main campus (Social Sciences Humanities & Economics).

AGES offers the unique opportunity to study agriculture as a complex social-ecological system, in order to:

- understand its agronomic and ecological basis,
- critically reflect on the underlying political, historical and social relations
- think agricultural economics from an ecological premise, and
- reflect ethically and conceptually on agriculture(s) and human-nature interaction.

You will learn to interpret and connect knowledge from all relevant disciplines, and to manage and mediate transformative initiatives.

Required is an above-average Bachelor degree in the agricultural or social sciences, economics or humanities and excellent command of the English language. As an international program, AGES will kickstart your intercultural and interdisciplinary competence for a meaningful career in shaping the transformation of agriculture and the food system.

Detailed information on the program website: <https://www.uni-kassel.de/uni/en/27131>

Best regards,

ERASMUS + TEAM FB 07
